**Sergey Govorushko : Human Impact on the Environment: An Illustrated World Atlas** before purchasing it in order to gage whether or not it would be worth my time, and all praised Human Impact on the Environment: An Illustrated World Atlas:

This atlas presents a collection of geographical maps showing human impact on the environment. A wide variety of human impacts are discussed, ranging from the energy, mining, transport and agricultural industries as well as less

visible impacts such as those of space exploration. This book is a highly illustrated atlas with 300 photos from 70 countries. Each map is accompanied by a short description of each human impact and its effect on the specific natural environment.

The work is divided into six broad chapters that outline the manner in which humanity has influenced the environment with various activities and behaviors. The work contains a fine index, and each section lists multiple print and electronic references for additional reading. This book is recommended for all libraries . Summing Up: Recommended. All readers. (J. C. Stachacz, Choice, Vol. 54 (2), October, 2016)From the Back CoverThis atlas presents a collection of geographical maps showing human impact on the environment. A wide variety of human impacts are discussed, ranging from the energy, mining, transport and agricultural industries as well as less visible impacts such as those of space exploration. This book is a highly illustrated atlas with more than 300 photos from more than 60 countries. Each map is accompanied by a short description of each human impact and its effect on the specific natural environment.About the AuthorSergey Govorushko is a chief research scholar at the Pacific Geographical Institute, Russian Academy of Sciences. He is also Professor at the Far Eastern Federal University (Vladivostok). Sergey Govorushko received his PhD from the Institute of Geography, Russian Academy of Sciences. His research activities focus on the interaction between humanity and the environment, including the impact of nature on humanity; the impact of humanity on the environment; and assessment of the interaction (environmental impact assessment, environmental audit, etc.). He has authored nine and co-authored fourteen monographs.
