Detailed, durable and easy-to-readBy Andrea MeyerThis map makes it easy to distinguish major roads from minor ones, which is very important in Iceland because some "major" roads are unpaved and some minor roads are only for four-wheel-drive vehicles. What I liked most about the map was its use of icons along roads to indicate waterfalls, caves, lighthouses, museums, geysers and geothermal features. This made it like a mini-guidebook and ensured that you didn't drive by something interesting without knowing it. In addition to buying this map, I also bought one by Cartographia. After comparing the two maps, I left the Cartographia at home because the ITMB map was so much more detailed and easier to read. Finally, after the two-week trip, I appreciated how durable (to folding and re-folding every which way) and waterproof this map was!1 of 1 people found the following review helpful. We Love Iceland!By John EllisOur family just made its first ever trip to Iceland. We love Iceland! We explored the south of the island from Reykjavik nearly to Hofn. It struck us as like Montana or Wyoming, or perhaps the canyonlands of Utah, only in the middle of the Atlantic Ocean. The roads are not many, but they were new to us in our rented car, and we consulted this map constantly. We did find, however, that several times we got smaller area road maps from local sources (hotels, gas stations, etc.) that were more detailed, which made orienting ourselves even easier. Best aspect: The map came quickly, giving us plenty of time to consult it before we left...helpful in planning and, even more, in simultaneously heightening and satisfying our excitement.0 of 0 people found the following review helpful. Beautiful and helpful map of IcelandBy Berkshire BillThis is a beautiful map of Iceland. It shows elevations and the wide variety of kinds of roads that exist there - from the main Ring Road to the off-road-vehicle-only roads in the interior of the country. (When you rent a car in Iceland, the rental place will likely give you a map that says "YOU MAY NOT DRIVE PASSENGER CARS IN THIS AREA, referring to a large portion of interior Iceland.) Having a good map with elevations clearly marked is very helpful in a place like Iceland. My one and only gripe is that the map is split down the middle of the country, so you'd need two of them to hang a full map of Iceland on the wall.

Double sided road and travel map at the scale of 1:425,000 with an inset street map of central Reykjavik and a complete place name index. Distinguishes roads ranging from major paved/unpaved roads to other roads. Legend includes tunnels, ferry routes, international/domestic airports, airfields, view points, points of interest, ruins, churches, museums, hot springs, tourist huts/lodging, emergency huts, campsites, golf courses, fishing sites, ski areas, waterfalls, geysers, gas stations, caves, lighthouses, National Parks, swimming pools. Printed on durable synthetic paper.
