Idioms are a very important aspect of the English Language. Idioms can be formed in many ways. For example, the word "man" has been used to form many idioms. The parts of the body have been used to form numerous idioms. The names of various animals and various objects have also been used to form idioms. Events and stories from theology, history, geography, science, mythology, legend, romance, economics, linguistics, medicine, law, politics, current events, sports, mathematics, biology, philosophy, and other subjects have been used in order to create this interesting branch of English. Not every item in this book is an idiom. Collocations, common sayings, proverbs, and interesting expressions have all been included in this book. The aim is to help the student and English learner in every way possible to use English in an impressive and colorful manner.
