**Living Language : In-Flight Hungarian: Learn Before You Land (English and Hungarian Edition)** before purchasing it in order to gage whether or not it would be worth my time, and all praised In-Flight Hungarian: Learn Before You Land (English and Hungarian Edition):

It is not related to the other Central European languages, it is not derived from Latin. Heck, it isn't Indo-European.This is important when considering what to buy when trying to learn the language in that it means: 1. you are not going to recognize individual words because they are not similar to the

same word in French, Italian, Spanish, German or English and 2. you are not going to be familiar with the vowel or the consonants. There are sounds unknown to English in Hungarian. So why am I babbling on about this? One of the first phrase this ill-thought teaching method tries to teach you is " I don't speak Hungarian very well". Or Nem nagyon beszélek magyarul. They say it once (at normal speaking rate!), give you time to register just how completely unprepared you are to repeat what you just heard and then they move on to the next phrase. I kid thee not. I would bet that sometimes as they were recording this stuff they found it hard not to laugh. The third section does cover numbers and is probably the most useful section of the CD. One word at a time when learning this unique language is about right. I have a Hungarian neighbor and when she (w/ infinite patience) tries to teach me words, I usually require three or four attempts to get them right. There are no sections devoted to individual pronouns, verbs, etc. There are sections (like the one on restaurants) where they give you individual words like plate, etc. Those are useful. The book is a necessity the first few times you listen to each section. The phonetic pronunciations are essential and help you to pick up on things like the Hungarian tendency to stress the first syllable. And the book helps you to pick up on individual words. I guess that what I am saying is that this is not necessarily a bad product. It is certainly not what I would recommend to anyone that needs a quick intro to this language. When I find that product, I will review it. 0 of 0 people found the following review helpful. Love the In Flight series By upstatechef I absolutely love the In Flight series and have used it to get a tourist level mastery of 7 different languages for our travels. I suggest getting it 3-4 months in advance and just listen at first without trying to say anything. Eventually you will pick up on where the words begin and end. It can be overwhelming at first if you try to repeat the phrases right away. This series does not do the annoying thing of breaking the words down into syllables, and it doesn't waste time on the alphabet either. Basic phrases you will need for traveling - food, airport, hotel issues, etc. Fabulous!!! 0 of 0 people found the following review helpful. Worth every Forint By A. Glasser I wouldn't wait for the flight, but I listened to these tapes for a couple of months on my commute before going to Hungary and it was very helpful. Some suggestions. It would be more helpful if you begin not just by listening, but by sitting down with the book and getting used to the written word. Then once familiar, listening can be more fruitful. I managed to master a few important phrases like Hello, yes, no, I don't speak Hungarian, do you speak English, excuse me, how much, where is.. and sorry. But if I could do it again, I would have made a more concerted effort to learn my numbers (at least to 5) and as much of the CD as possible. It is only one CD, but it covers a lot of material. I believe that if you memorized everything in the CD, you would do very well. Keep in mind that there is a fair amount of English used in Hungary, it seems to be the common language between all non-English tourists, but it helps to learn a little Magyar, and I wholeheartedly recommend this CD.

Living Language In-Flight Hungarian is the perfect boarding pass to learning Hungarian before you land. There's no better way to make use of all that spare time on a plane than to master the essentials of a language. This 60-minute program is the simplest way to learn just enough to get by in every situation essential to both the tourist and business traveler. The program covers everything from greetings and polite expressions to asking directions, getting around, checking into a hotel, and going to a restaurant. There are even sections for meeting people and spending a night on the town. Short lessons make In-Flight Hungarian easy to use, and a handy pocket-sized insert is included as a cheat sheet for use on the go.
