**National Geographic Maps - Reference : India Classic [Laminated] (National Geographic Reference Map)**  
before purchasing it in order to gauge whether or not it would be worth my time, and all praised India Classic [Laminated] (National Geographic Reference Map):

1 of 1 people found the following review helpful. Fantastic detail and just the right size By Oscar 3rd We wanted this to help our granddaughter with a class project in middle school. The detail and clarity was so good, that we just couldn't destroy the map by cutting it up and pasting, etc. Instead we used clear plastic overlays and with the map as the base, created a 3-D, layered effect that preserved the map. It is now being used in the classroom for others to enjoy. Well worth the money and well protected in a plastic laminate. 0 of 0 people found the following review helpful. Five Stars By JOEL LEVINE Very well- done. Lots lots of detail, all effectively worked-in. 2 of 2 people found the following review helpful. Great detailed map for the price. Nicely laminated for class projects. By Jay Porter This map is very detailed and laminate is nice as well. It came packaged nice too. It has the latest states marked (Andrapradesh,

Telangana) correctly. Who knew India keeps splitting states in last 10 years.

As attractive as it is functional, National Geographic's Classic style political map of India is one of the most detailed and comprehensive maps ever published for India and southern Asia. It includes India, Sri Lanka, Nepal, Bangladesh, Bhutan, Tajikistan, and portions of China, Pakistan, Afghanistan, and Myanmar. The India map is punctuated with thousands of place names, and embellished with shaded relief which highlights the region's dramatic topography in such places as the Tibetan Plateau and the Himalaya. Also shown are the country's infrastructures, including airports, railroads, super highways, canals, major oil fields and pipelines, canals, and more. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:5,625,000 Sheet Size = 23.5" x 30.25"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
