National Geographic Maps - Reference : India Classic [Tubed] (National Geographic Reference Map) before purchasing it in order to gage whether or not it would be worth my time, and all praised India Classic [Tubed] (National Geographic Reference Map):

0 of 0 people found the following review helpful. My rating based on reasonable expectations for a standard National Geographic mapBy garden therapistI've tried to be realistic and fair in my rating, realizing that my experience with NG maps should have prepared my for the very small print, which made it difficult to highlight the areas I wanted to feature in my presentation. I realize now that for larger print I would have needed a larger map. India is just so densely populated and a large land mass.Delivery was prompt and as promised. Packaging was the proper professional tube inside a larger box.0 of 0 people found the following review helpful. Great mapBy AlexI love the detail and amount of information on this map.0 of 0 people found the following review helpful. Five StarsBy CustomerItem received as advertised.

As attractive as it is functional, National Geographic's Classic style political map of India is one of the most detailed and comprehensive maps ever published for India and southern Asia. It includes India, Sri Lanka, Nepal, Bangladesh, Bhutan, Tajikistan, and portions of China, Pakistan, Afghanistan, and Myanmar. The India map is punctuated with thousands of place names, and embellished with shaded relief which highlights the region's dramatic topography in such places as the Tibetan Plateau and the Himalaya. Also shown are the country's infrastructures, including airports, railroads, super highways, canals, major oil fields and pipelines, canals, and more. The map is packaged in a two inch diameter clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:5,625,000 Sheet Size = 23.5" x 30.25"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
