There's a concise overview of top attractions, with beautiful pictures, which is a great place to start, but its usefulness stops there. There are no maps, no suggested itineraries, no budgets, no walks. It's even less useful than EyeWitness, and with fewer pictures. I wanted something other than Lonely Planet because I'm no longer a very-low-budget backpacker, but this is not the middle ground I expected.2 of 2 people found the following review helpful. OK, but not comprehensiveBy beakerThis really didn't contain enough information for my trip. I ended up buying an Insight Guide while in Jakarta, which contained a great deal more information and was much more helpful.2 of 2 people found the following review helpful. Just the highlights of Indonesia, not a travel guide.By GregNot what I expected. The information it does have is well organized

and it gives some good info but I need a real travel guide before I visit Indonesia.
