Sunil Sethi : Inside Asia (2 Volume Set) before purchasing it in order to gage whether or not it would be worth my time, and all praised Inside Asia (2 Volume Set):

I have been to a fair few of these hard to visit interiors and this book does them justice. I got mine used for \$40. It's easily worth double that, if you want a superb coffee table book on unusual Asian interiors. 3 of 3 people found the following review helpful. Inside Asia By bernardo lourido anzola What's really amazing about these books is the great selection of buildings and sites chosen. You will not only find luxurious hotels and homes, but temple ruins and old decaying houses, always with a great architectural taste. Those are 2 beautifully presented books themselves, with a kind of satin hardcover. I've seen "Inside Africa" as well and there's no doubt that are as surprising as these. I'll try to complete the collection. 1 of 1 people found the following review helpful. Asian Grace By G. Mariano These two volumes represent both new world and old world Asia

and how they blend at present. The photographs are wonderful and the text suffices. You'll also see a few western influences utilized by some homeowners. It is a wonderful addition to my collection and these books are gorgeous to boot.

Zen. Soothing. Mystical. Meditative. All the most serene words in the world couldn't begin to describe the effect of Asia's most beautiful interiors. Whether it's a monastery in Tibet, a coffee plantation in Java, or a Tadao Ando-designed house in Japan, each interior chosen for this book is remarkable not only for its aesthetics but for its spirit. Presented in two sublime volumes, these interiors have what it takes to transport you to a sacred place. Breathe deeply, delve in, and be inspired.
