I don't care about groups of children, people in the marketplace, people in a bar, people in a restaurant, 2 men sitting in a library, etc, etc... but there are a good number of other good pictures, but not nearly enough of the BIG INCA sites... not much in the way of maps. If you're spending the money to go to Peru,

buy all 4 of the books I got, but read this one at home and leave it there; take Lonely Planet for maps of cities and archeological sites. And don't use ANY book for the final word on hotels, restaurants, busses, trains, guide services, etc.. also reviewed: Lonely planet Peru, Rough Guide Peru, and Peru Handbook by Alan Murphy.0 of 0 people found the following review helpful. Love Insight Guide - buy one for each major country ...By kathleenLove Insight Guide - buy one for each major country (or US state - Alaska); easy to read great photos and lots of information...makes a good 'souvenir'26 of 26 people found the following review helpful. Get's you ready to go!By Troy A SmithWhat a wonderful country! This book like all the other Insight Guide books that I've read (Costa Rica, Morocco) gives an excellent history and overview of the country. Many people complain these books are to vague and don't cover the specific details of trip planning. I will agree with that, but I won't complain. These books are great for getting an idea of what to see and where to go, not where to sleep and eat and how much. The pictures in these books cover such a wide range of sites and topics. I recommend, buying an insight guide book for the countries flavor, and a seperate guide book or two for the trip planning details, (I prefer Lonely Planet). I have, and will continue to buy an Insight Guide book for everywhere I travel. The best thing about these books is after your trip when you look thru them again and see pictures of the places you've been, it truely takes you back. Buy this book, go to Peru and enjoy!!!
