before purchasing it in order to gauge whether or not it would be worth my time, and all praised Into the Amazon: One Lost World, Thirty Men, Seven Mysteries (Complete Study Course):

1 of 1 people found the following review helpful. Excellent travelogue and documentary By pingpongpaI thoroughly enjoyed watching these videos. Doug Phillips does a fine job exposing environmental determinism and showing the correct view of God's creation: that man should take dominion over God's creation and be good stewards of it. The Ica stones were particularly compelling to show that that ancient civilizations had great technology and men lived with dinosaurs. Doug gives much information about the and shows we need to learn much more.
