National Geographic Maps - Reference : Iran Classic [Tubed] (National Geographic Reference Map) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Iran Classic [Tubed] (National Geographic Reference Map):

8 of 18 people found the following review helpful. Kowtowing to ArabsBy SS SaffariIt is a small token for the authors of this map to mark the Persian Gulf by its correct name. But, to write sentences on a map regarding the claims of a bunch of brutal Arab dictatorships that line the Persian Gulf proclaiming the islands that were a part of Iran before they were even a country as their territory is shameful act by the authors, to say the least.

National Geographic's political map of Iran is one of the most authoritative and detailed maps available for this country that is heir to one of the world's oldest civilizations. This Classic style wall map features a bright color palette and stunning shaded relief that has been a hallmark of National Geographic maps for over 75 years. Thousands of place names, accurate political boundaries, national parks, mountain peaks and passes, swamps, deserts, lava fields, dry lakes and major infrastructure networks such as highways and roads, airports, railroads, oil fields and pipelines, and canals are detailed. Significant bodies of water, such as the Persian Gulf, Caspian Sea and Strait of Hormuz are shown with coastal bathymetry using depth curves and soundings. Coverage also includes Iraq, Qatar, Kuwait, Bahrain and parts of Syria. Saudi Arabia, UAE, Oman, Pakistan, Afghanistan, Uzbekistan, Turkmenistan, Azerbaijan and Armenia. The map is packaged in a two inch diameter clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:3,696,000 Sheet Size = 30.25" x 23.5"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of

mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
