**Ministry of Labour; Friedel Stern Department of Surveys : Israel in Pictorial Maps** before purchasing it in order to gage whether or not it would be worth my time, and all praised Israel in Pictorial Maps:

Very good, publication date guess, out of print, blue and white leatherette with bronze gilt font on horizontal oblong format. 35 numbered pps w 17 full page, full color maps of various regions in Israel identifying towns, moshavs, kibbutzim, arab villages, transportation, historic sites and other typical map designtions. Following each map is full page description, including b+w photo. Additionally there is a COMMENTARY and LEGEND section explaining each map with a geographical, historical and explanation of drawings description. Interesting to compare this with current maps of Israel. Book is without writing, interior pages quite clean with almost no distractions. Cover shows shelf wear, few bumps on lower edge and crease on back. Please see our photo. Relatively rare in this very good condition.
