My baby loves the page where you can see the crab.0 of 0 people found the following review helpful. Nice and SimpleBy Christina FixemerReviewed by Christina Wantz Fixemer on 09/20/2008Young children will enjoy this simple board book. Each full-page photo has a "Wh-" question, something that children love to answer and that grown ups don't ask enough. Each answer is in large, easy font that very early readers have a chance at grasping.The Smithsonian line of children's books seem to be well-research into what works for the target ages, and this little board book is no exception. If you're looking for something highly visual and meaningful, this is a good choice.

Fun and facts for children from one of the most trusted names in learning: the Smithsonian Institution.
