The Best Atlas There Is....By GAL ON THE GOI have looked through many atlases in my time, because I love the exploration of the world... so I get out the book and explore with my fingers and dream about new destinations. When I saw this book originally I thought THIS IS THE BEST...It has been proving that exact feeling ever since that was over twenty years ago. National Geographic has the world in it's hand so to speak and I wouldn't expect any different. Great Book all the way around...The best company for world exploration, to my way of thinking, if I could write and photograph for anyone in the world it would be them...0 of 0 people found the following review helpful. Great, large-format atlas from Nat GeoBy JayBeBasically I agree with Alan Eize's review (15 Oct 2004, of the 8th edition): this 7th edition is better, for the reason he cites, and I was very happy to get it. A really gorgeous atlas.

More than 140,000 names designate places on 75 maps and in the 134-page index of this Atlas.
