Juliette de Bairacli Levy : Nature's Children before purchasing it in order to gauge whether or not it would be worth my time, and all praised Nature's Children:

The classic text for natural child rearing, now revised and expanded. Back in print at last! Remedies, recipes, and

fascinating lore on nourishing and healing children naturally. "Surely this is how our children were meant to be raised and nourished! In harmony with the rhythms of the earth, seasons, wild creatures, and plants, the author shares her knowledge and compassion. How I wish I had known of Nature's Children when my son was younger, but it's never too late to begin employing the remedies and recipes contained in this marvelous book which is dedicated to the simple life and family health." (Susun Weed)
