Stanley W. Paher : Nevada Ghost Towns Mining Camps Illustrated Atlas Volume One-Northern Nevada (Nevada Ghost Towns Mining Camps) before purchasing it in order to gage whether or not it would be worth my time, and all praised Nevada Ghost Towns Mining Camps Illustrated Atlas Volume One-Northern Nevada (Nevada Ghost Towns Mining Camps):

6 of 6 people found the following review helpful. Out of DateBy M. DeesFine for a historical reference, but too many changes have occurred to the landscape, routes, and the towns themselves since this book was written.Having been raised in Nevada I return almost yearly for some back country traveling including hiking and fishing. Bought this book with the intent of locating some forgotten towns and camps. I gave up after 3 attempts resulted in failure, or the finding they lacked the charm I expected. Roads shown no longer exist, or were apparently re-routed in other directions due to washouts over the many years, making the directions given hard to follow, if not impossible in some instances. Too bad GPS locations aren't provided.Of those obscure locations that can be found, most aren't worth visiting, as they seem to have become dumping grounds, or visited by youths partying and trashing the area.0 of 0 people found the following review helpful. Five StarsBy Aleta N.ok0 of 0 people found the following review helpful. Four StarsBy Tom BaillieIt is fun reading, but the maps are not detailed and many of the pictures date to the fifties.

Covering the northern portion of Nevada, this atlas includes sites in northern Nevada. It has 37 color maps and 265 vintage photos by ghost town pioneer Nell Murbarger. Each of the maps in this atlas are keyed to the corresponding historic sketches found in its popular companion volume, Nevada Ghost Towns Mining Camps by Stanley W. Paher.
