National Geographic Maps : New York City (National Geographic Destination City Map) before purchasing it in order to gauge whether or not it would be worth my time, and all praised New York City (National Geographic Destination City Map):

3 of 7 people found the following review helpful. One of the worse maps out thereBy Rick Jr.I bought this map because of an Atlas that I have that doesn't cover every single detail of Manhattan. I didn't expect this map to cover EVER single detail of Manhattan but this map DOESN'T EVEN COVER ALL OF MANHATTAN! The title of this map is "New York City DestinationMap(since when is Destination and Map one word?),this map ONLY COVERS one borough in New York City and it doesn't even cover that entirely as I eluded too earlier!,it only covers Manhattan so if you're looking for a Map of every borough of the city,PLEASE do yourself a favor and DO NOT PURCHASE THIS MAP!. I'll be honest,I don't have much experience with maps but this probably has to be one of the WORSE maps ever. The title is extremely misleading!,it says New York City Destination map and all of that but it doesn't cover all of new york city,it should say New York City most of Manhattan map.Wow,I cannot begin to tell you how disappointed I am in this product,the title is very misleading and folks I have to tell you,honestly I feel I wasted my money and just like most of us,I don't have money to waste! I'll be looking for another map in the near future. Also,I just want to say that print on this partial map (it doesn't deserved to be called a full map) is very small,so if you have any vision problems or you don't have a magnifying glass,you may have a hard time reading some of the tiny print on this map.
