National Geographic Maps - Reference : New Zealand Executive [Laminated] (National Geographic Reference Map) before purchasing it in order to gage whether or not it would be worth my time, and all praised New Zealand Executive [Laminated] (National Geographic Reference Map):

The reference map of New Zealand uses National Geographic's Executive style with an antique-style color palette and stunning shaded relief. The map shows this island nation in great detail, from the subtropical North Island (Te Ika-a-Māui) to the glacial carved valleys of Fiordland on the South Island (Te Waipounamu). The North Island is best

known for large volcanic lakes and the cities of Auckland and Wellington. The South Island is famous for the Southern Alps that run along the spine of the island. The highest point in the country is Aoraki (Mount Cook) and is found in the Southern Alps. The first settlers of New Zealand were the Maori from Polynesia, the names on the map reflect this history with both English and Maori variants. The map also features a transportation network including highways, roads, passenger railroads, and major airports. All National Parks are also shown. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:2,300,000 Sheet Size = 23.5" x 30.25"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
