From zero3west Ltd : New Zealand, North Island before purchasing it in order to gage whether or not it would be worth my time, and all praised New Zealand, North Island:

2 of 2 people found the following review helpful. Perfect country, perfect map By M. Lane This is larger and more detailed than most other NZ-NI maps out there. It's perfect for planing different trip paths with your travel companions, and the matte material "likes" to be written on. It's really a lot better than a computer screen for this one application (3 people sitting around a table planning a trip and making notes) and I am someone that hates to use paper for anything. It's also a good backup to electronic maps while in country. After your trip, pin it to the wall of your garage or basement as a decoration and memento from your trip. I put photos around mine. New Zealand is the best country in the world, you will not be disappointed. If you can't go now, put this map up as a reminder of your goal.

This comprehensively indexed map is presented with clear cartographic design. At a scale of 1:800,000 it is ideal for planning and touring. The hill shading and coloured height layering gives a good representation of the surrounding topography and areas of interest. Walking tracks, themed routes, population breakdown and points of interest all add detail to present an overall picture of this very scenic island. Contains city maps of Wellington and Central Auckland, each with a street index. The legend is shown in English, German, French and Spanish. This map will stand up to the

rigors of touring being both waterproof and rip-proof.
