This was just as I expected. The pictures are great and offer great facts about each continent. I wish there was more information about Antarctica but we can go to the Internet for that. Overall my expectations were met as we use this daily he always asks to read through it with us.69 of 71 people found the following review helpful. I knew I wanted an excellent atlas/textbook that was able to aid in my schoolingBy phillip fallsFirst of all, this is written under my husband's account, but I began homeschooling my 8 yr old last year. And now, as he is a 3rd grader, and began studying history/geography, I knew I wanted an excellent

atlas/textbook that was able to aid in my schooling.. However, I was not sure if any such thing existed.. Then, I stumbled upon this National Geographic Kids Atlas...What a wealth of information!!!! And the way it is broken down country by country!!! Absolutely so informative!! It gives political info about every countries pop., highest mountains, longest rivers, largest cities, etc..!! My 18 yr. old college bound daughter took one look at it, and said, "man, why couldn't I have had something like this to help me when I was studying geography? This is totally cool!! " And she graduated this past May, Summa cum laude, is an avid reader, and was recognized as one of the top 20 Sholar Bowl History Students in the nation two years in a row...(so I am confident she knows her material!!) If you are looking for any material for your home, as a homeschool mom, or just for reference, this is it!!5 of 5 people found the following review helpful. Big hitBy Anne EliyahuMy daughter loves this atlas! She was reading it all weekend. Not only does it have maps from all over the world , it has fun activities for kids and interesting facts about a variety of topics. It was very reasonably priced. I'm very happy with my purchase!

In the new, reduced trim size edition of National Geographic's award-winning World Atlas for Young Explorers, we've punched up the content with the very latest maps, data, and essays about the world and all that is in it. More than 200 color images transport kids to intriguing places, and 115 pages of full-size National Geographic maps help them locate countries, cities, regions, and more. Created by the most trusted name in cartography, these colorful maps have been custom designed for middle-grade students. Boundaries, place-names, and data reflect the most current information available, and every map appears in the context of surrounding areas to ensure that a full picture of the world develops. Same-size physical and political maps make for easy comparisons and help youngsters understand how physical features influence patterns of human settlement and economic activity. Locator globes and color-coding make it easy for kids to keep track of where they are and quickly navigate from one region to another. Stunning images from space draw visual links between real-world scenes and cartography. Plus, an interactive Web feature links kids to the Society's vast archive of maps, articles, photos, videos, music, languages, crafts, quizzes, and more. With a dynamic reference like this, homework has never been so fascinating.

About the AuthorNational Geographic is a recognised authority in mapping excellence. For 119 years the Society's maps have helped spread geographic knowledge to people around the world. A multi-million-dollar database allows National Geographic to combine the latest data gained by space-age technology with innovative digital mapping techniques to create state-of-the-art political, physical, and thematic maps. Meticulous research and attention to detail have established a standard of achievement that is second to none.
