Capt. George Blance : Norie's Nautical Tables (Nories Nautical Tables) before purchasing it in order to gage whether or not it would be worth my time, and all praised Norie's Nautical Tables (Nories Nautical Tables):

0 of 0 people found the following review helpful. Nories; celestial navigation the old way. By Kees Visscher Wonderful book, learned about it from a South African Mate during an ocean crossing from Cape Town to the Acores. I had learned to do celestial navigation with almanac and self-programmed formulas. Nories enables you to do it with tables only. 0 of 0 people found the following review helpful. Five Stars By Simon Grgoire The book came in excellent condition.

This famous set of mathematical tables was first published in 1803. It has been a bestseller ever since, and despite

developments in electronic navigation it remains an essential requirement for anyone learning and practising astro-navigation. George Blance, has worked for some time on the modernisation of all the tables for this major new edition. New tables have been included, obsolete ones deleted to conform with changing techniques of navigation, with the aim of improving the accuracy of the calculated position and reducing the tedium of the calculation. All the tables required for coastal and deep sea navigation are included A simple uniform method of interpolation for all the trigonometrical tables is used Certain tables and data are also included which are not readily available on board ship or are only used in the examination room. The section Seaports of the World has also been extensively updated and restructured with several hundred additional ports. The ports are listed geographically in the following order from Arctic Russia, Scandinavia, the Baltic Sea, the Atlantic coast of Europe, the Mediterranean Sea, West Africa, East Africa, Arabia, the Persian Gulf, the Indian sub-continent, the Far East, Australasia, the west coast of North and South America, the east coast of North and South America. At the back of the section is an index of the seaports.
