By Edgar Lee Payne Another winner and well worth the wait. Lots of practical info on shooting water, many things that you haven't even thought of yet but are very important. The organization of the various falls within regions makes it easy to plan a day of shooting. Filled with color images that inspire you to get out and shoot. Well worth the investment if you only head out once or twice to shoot falls but most folks will be hooked on shooting moving water after ingesting a chapter or two of this book. 0 of 0 people found the following review helpful. HammerStringJust when I thought the 2nd edition was the greatest thing, here comes Adams with another beautiful collection of his photography and experience! Since my old 2nd edition copy is falling apart, I was overjoyed to see this new one. It's loaded with stunning new photographs of nearly every fall, as well as including many more new ones not included in the 2nd edition. You'll be tempted to buy 2 copies -- one for hikes and one for the coffee table!

Since the first edition of Kevin Adams's North Carolina Waterfalls came out in 1994, this book has sold almost 65,000 copies. Since the 1990s, Adams has established a widespread and well-respected reputation as a photographer, naturalist, writer, and teacher. His nature photography seminars and photography tours are widely popular. In this third edition of his classic photography/hiking guide, for the first time Adams is finally given the opportunity to showcase his beautiful color photographs. Although he provides information for 1,000 waterfalls in this new book, Adams specifically highlights over 250 of the best waterfalls found in North Carolina with full descriptions, comprehensive directions, and four-color photographs. New additions to the selection of waterfalls include: High Falls on the West Fork of the Tuckasegee River Fall Creek Falls in the new Mayo River State Park Reece Place, East Fork, and Graveley falls in the new Headwaters State Forest Two waterfalls in Pinnacle Park in Sylva Many gems hidden away in Pisgah and Nantahala national forests unknown to the general public Waterfalls east of the mountains such as Carvers Falls in Fayetteville and Lanier and Fish Jump falls in Raven Rock State Park From its comprehensive coverage, detailed trail directions, to its helpful photography tips and beauty ratings, the new North Carolina Waterfalls remains the definitive guide to its subject.
