De Lorme Mapping Company : North Dakota Atlas Gazetteer before purchasing it in order to gage whether or not it would be worth my time, and all praised North Dakota Atlas Gazetteer:

0 of 0 people found the following review helpful. Superior Detailed Maps! By Jorge This is another addition to my collection of these excellent State map books. I have added North Dakota because of relatives who settled in the State in the late 1800's at Wimbledon. These Atlas/Gazetteers are the best that I have found for studying the map details of the individual States. 2 of 2 people found the following review helpful. Works great if you need the detailed map. By L. J. I have the Minnesota Atlas and have used it extensively for my job. As we also work in North Dakota quite a bit I found it difficult to find county roads on standard maps so I purchased the North Dakota Atlas. Now I have no

problems locating those smaller county roads. If you use state and federal highways only, then a standard road map found at all the gas stations will work fine. But if you travel the smaller roads often, this Atlas works great. 0 of 0 people found the following review helpful. Best back roads maps! By Customer Delorme atlases are the best maps for getting around the back roads in remote areas. If you enjoy going off the beaten path, a Delorme atlas is indispensable.

Wouldn't it be nice to always have exactly the right kind of map, whatever your needs may be? You will, with the uniquely versatile DeLorme Atlas Gazetteer Series. These topographic atlases cover individual states with the most comprehensive detail available, including back roads, backwater lakes and streams, boat ramps, forests, wetlands, trailheads, campgrounds, public lands, prime hunting and fishing spots, and countless landmarks and points of interest. You'll also find a wealth of information on everything from family outings to wilderness adventures. The Atlas Gazetteer is ideal for outdoor recreation, business travel, home or office reference, and countless other uses.

About the Author DeLorme has been directly responsible for many of the major technological advances made in the mapping industry over the past 30 years.
