0 of 0 people found the following review helpful. Excellent, detailed map By TSExcellent, detailed map. Would be nice to have a little more info on relative difficulty of the hikes, but that's available elsewhere. But those elsewhere describe the hikes, but don't show the actual topography and detail of the trails. They're useful for helping to pick out the hikes you want to take, but this is the baby you want to have with you while you're taking the hikes. 0 of 0 people found the following review helpful. These Trails Illustrated Maps are the best! By bka0721 Exactly what I wanted. I have earlier versions, all the way back to when they were just Trails Illustrated and no National Geographic. But the new versions have currently closure info and other trail info. While the older versions give better contour detail than these new ones. The new ones give greater detail on the man made things like building, parking, and other infrastructure. So having old and new is the way to go!
