**National Geographic Maps - Reference : Oregon [Laminated] (National Geographic Reference Map)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Oregon [Laminated] (National Geographic Reference Map):

2 of 2 people found the following review helpful. A Cartography Buff's Dream By The Armchair Critic Gorgeous map. I just had it framed. I took away one star for the paper stock quality. Really thin and fragile. It seems everyone is skimping on paper these days, but I had hoped Nat Geo would be different. Nonetheless, once you get it framed that's not an issue unless you live to be 150 years old. ;-)  
1 of 1 people found the following review helpful. Love this map By Justine Dauenhauer Love this map. It is much thinner paper than I had expected. Take care in pinning and mounting the map because it tears very easily. Otherwise it is beautiful and very detailed. My friends and I are using it to track and pin all of our hiking trips throughout Oregon.  
1 of 1 people found the following review helpful. Looks nice! By Kyra C. Bought for my husband's office. Found a frame at Walmart and just barely needed to trim two of the sides. Looks nice!

National Geographic's wall map of Oregon brings the rich and diverse topography of the state to life in elegant detail. Mountain ranges, prominent peaks, major lakes, rivers, and reservoirs, and other geographic features are highlighted. In addition to hundreds of place names, this map includes the precise locations of cities, major roadways and railways, airports, and national and state parks. Stunning shaded relief and vibrant colorization distinguishes mountain ranges, forests, deserts, valleys, and other physical topography. The Pacific Crest Trail, a long-distance hiking and equestrian trail that runs through the entire state from the border with California into Washington, is shown as well. This striking map would be an attractive addition to any study or office. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:725,765 Sheet Size = 40.5" x 30.25"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
