**Zahra Sadighzadeh, Vctor M. Tuset : Otolith Atlas from the Persian Gulf and the Oman Sea Fishes** before purchasing it in order to gage whether or not it would be worth my time, and all praised Otolith Atlas from the Persian Gulf and the Oman Sea Fishes:

The biodiversity of the Persian Gulf and the Oman Sea is unique: corals, dugongs, birds, sea turtles, oysters, jellyfish, sea star, sea cucumber, anemones, fishes, crabs and many other species even whales and whale sharks live in this

marine ecosystem. In this atlas, we show the result of 6 years of labour collecting fish samples and more than 1 year collaborating of scientists from Iran and Spain.
