Happy travels!By CustomerOk here is what I wished I knew before buying this as a gift for two people:It reminds me of a phone book both on binding, paper used and ink type. I took a few photos of it so you can see for yourself. I hope this helps you make your own decision . Happy travels!!75 of 76 people found the following review helpful. Very handy!By SpottedBrownieI ordered this book as a companion for an upcoming cross country trip. It has every restaurant, hotel and gas station listed at each exit. We have no idea where we will be each night as we are going in February and the weather is certainly a factor and will determine our route. Now we will be able to plan our meals and coffee breaks and find (and make reservations) at hotels along the

way. I usually use my GPS to help find food and lodging but the GPS finds all close by restaurants and hotels, even those that we have already passed or are far off the road we are traveling on. It will be nice to look at a book that tells what is coming up not what we have left behind. It will be especially helpful for us to be able to plan in advance when we are traveling where there are very few exits. 49 of 50 people found the following review helpful. Great resource By NIdaho This book is great if you are traveling the interstates. It lists all the rest areas, fuel stops and those that are RV or bigger rig friendly as well as other services you look for while traveling. We buy it every year. This was the first time we bought it on it was less expensive than the books website and was at my door in under two days.
