0 of 0 people found the following review helpful. Five StarsBy Claudette M.Happy with map. Delivery and map are more than expected. Thank you!0 of 1 people found the following review helpful. It is great !!By John AlamIt is great !! I love it alot. Will buy more in future. thank you guys. god bless american. I am finishing my words

The Solar System, Our Sun's Family, has two sides. The first side includes a description of how our solar system was formed, and shows a map of our solar system, with each planet's orbit in relation to the Sun and to the other planets. Interesting facts and figures accompany each planet's description. Side two is a stunning poster that shows images of each planet. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Sheet Size = 24.25" x 18.25"

About the AuthorFounded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
