discomfort the author experiences with respect himself and his life and the trip he undertakes to overcome it, Obaidur Rahaman doesn't fall neither in the Buddha's trap (talking about philosophical questions about life and the mental masturbations that eventually gave rise the to the travel) nor in the Lonely Planet one (describing city, monuments we all are aware of and whose postcards are already present in plenty of websites).As a result, the trip is not just a touristic experience but especially an instrument to meet the culture, discover unusual places, making new experiences (how to forget the talks at Brazilian schools ?). Some comic moments decorate the work.The reason I gave 4 out of 5 stars is that I'd like to have a little bit more pieces of information about the dead civilizations of South America and what we know about their lost culture. But my love for History might bias the judgement.0 of 0 people found the following review helpful. The details in this book make you feel like you are right there with him on his tripBy GinnyBThe details in this book make you feel like you are right there with him on his trip. What a Great book! I grew up as an Army BRAT and traveled so much as a child and young adult. By the time I was 27 I had lived in 37 homes. I loved my life as a BRAT and find that as an older adult, I am constantly thinking about traveling. I spend time researching where I would want to go and the things I might learn by going there. This book talks about this man and his thought processes as he makes the decision to go traveling, how he chose the places he went, and how he handled the experiences he went thru. It is an easy read and offers you an opportunity to sort out your own thoughts about traveling, other cultures, and our world.0 of 0 people found the following review helpful. Obaidur Rahaman, a native of India, embarks on a solo journey in South America. As the story unfolds it becomes clear that this is not going to be a typical story of a western backpacker. There are severe limitations of travelling alone and with an Indian passport. As he continues with his journey, he passionately explores the history, culture, and natural beauty of South America while constantly struggling with dilemmas, overestimated problems and occasional panic attacks. But he never loses heart, learns from his mistakes and keeps walking on his uncertain, unforeseeable, ever changing path. But what happens when he gets stranded in the Amazon unable to get the visa to cross the border? What happens when he is expected to give a talk in Spanish in front of a class full of Portuguese-speaking students. What happens when he gets caught up into a storm while boating alone in a lake infested by caimans (crocodilians) and piranhas?
