GarippoI ordered this for a dear friend who is soon moving to the Los Angeles area....my husband had this 2005 guide when we lived there, and it was a great resource to have, so we didn't hesitate to send one to our friend. He was excited to receive it and he has learned a lot even before getting there. He says he can't wait to put it in to use! More current editions didn't have as much good info. as this 2005, so we chose this one again.2 of 2 people found the following review helpful. Just in caseBy Steve HofstetterIf you don't have a GPS, you're stuck in 2005. This is perfect for you, as its a book of maps of what Los Angeles looked like in 2005.I keep it with me always, in case they ever invent a time machine and I want to go back just enough years to bet on the White Sox.0 of 0 people found the following review helpful. Really like the older / original versionsBy Robert YoungHad to buy used to get 2006 year, the new version maps pulled out a lot of building detail for things like university campuses. Even worse, the newer versions use a type face that is much more difficult to read.

New. Still in shrink wrap. Ready to ship with tracking information.
