**Jane Langton : The Time Bike (Hall Family Chronicles)** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Time Bike (Hall Family Chronicles):

The strangest things seem to happen to the Hall family--like the time Eddy and Eleanor had an adventure and found an enchanted diamond, or the summer their cousin Georgie flew with geese. Now their adventure is with time itself. It starts when Eddy receives an unusually large packing crate from his mysterious uncle, Prince Krishna, containing an old-fashioned bicycle, complete with a wicker basket--the kind of bike no self-respecting boy like Eddy would be

caught dead riding. The bike possesses more than just a basket, however: It possesses the ability to travel through time, and soon Eddy is on the ride of his life! But trips through time can have unpredictable results, and they're not without danger.... Newbery Honor author Jane Langton's sixth book about the extraordinary Hall family is a magical account of the perils--and surprises--of travel in the fourth dimension.
