very helpful ideas from this book but not as many as I have hoped. We traveled with our kids short-distance (2 hours to grandparents or to local attractions) and long distance (across several states) by plane and by car, and once overseas. It was always somewhat challenging. I was looking for ideas to make the "getting there" and other parts of the trip easier. It should be noted that we have 5 kids right now and so we have more things to figure out. The book will fit families with 1-3 kids best, especially those who are making a transition from an independent life to a one with baby on board.

I liked the "real world tested" advice in this book, and it isn't too long to be more of a headache processing the information than implementing it. There was plenty of tips that I have put into practice, that make the price of the book worth it. For example, I set up a little "play area" and a "drawing area" with all the toys, crayons, etc in it in our hotel room, and my kid just goes there and amuses herself when she needs it.

I bought this for my daughter. She and her first child are getting ready for a trip coming up and she said it has been very helpful.
