National Geographic Maps - Reference : The Universe [Laminated] (National Geographic Reference Map)

before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Universe [Laminated] (National Geographic Reference Map):

0 of 0 people found the following review helpful. A good gift By Arthur Daigle I ordered this poster as a birthday gift for my brother, a junior high teacher. He greatly enjoyed it and is having it framed for his room.

As far as we can see with our ever-improving telescopes, there are at least a hundred billion galaxies arrayed throughout the universe. Each, like the Milky Way, is an island galaxy containing billions of stars. This map uses graphic leaps of scales to show how our solar system fits within the vastness of the universe. The map also includes a universe timeline and a description of its evolution. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Sheet Size = 31.25" x 20.25"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
